**PFI Label for
barefoot shoes**

***For a natural walking
experience***

***–
tested & safe***

YOUR BAREFOOT SHOES' QUALITY CERTIFICATION

Barefoot shoes have firmly established themselves as a category in their own right in recent years. They combine a more intense sensory experience with the desire to get closer to the natural sensation of walking barefoot. At the same time, however, they lose some of the traditional protective functions – such as protection against temperature, moisture or mechanical stress.

The **PFI barefoot shoe label** shows that your products meet defined PFI criteria that **go beyond the statutory minimum requirements**.

Furthermore, the barefoot shoe quality label provides consumers with **clear guidance when choosing high-quality barefoot shoes**.

Our Labels help you to **effectively communicate the benefits of your products** – and demonstrate that your company takes its responsibilities seriously and clearly shows that it meets defined quality and safety criteria.

SHOWCASE THE QUALITY OF YOUR BAREFOOT SHOES – WITH THE BAREFOOT SHOE LABEL

Our criteria include:

Quality testing:

- Outsole
- Upper and lining materials
- Insoles and insole linings
- Shoe characteristics
- Outsole quality
- Wear behaviour of upper materials
- Specific properties (e.g. waterproofing)

Chemical parameters:

- Testing of substances relevant to the product
- Focus on materials that come into contact with the skin
- Compliance with strict, PFI-internal limit values

The label is awarded only if all PFI requirements are met.

QUALITY YOU CAN FEEL.
