PFI Label

"Vegan eco"

***The combination for
sustainability and
vegan products***

THE COMBINATION OF SUSTAINABILITY AND VEGAN STANDARDS

At a time when sustainability and a vegan lifestyle are becoming increasingly important, the **PFI 'Vegan eco' label** provides guidance.

It confirms that products not only meet vegan requirements but have also been assessed against certified organic criteria.

With the PFI label, you can demonstrate your commitment to environmental protection and animal welfare in a transparent and verifiable manner.

Take advantage of the **PFI 'Vegan eco' label** and combine the requirements of the **PFI 'eco'** and **'Vegan'** labels into a meaningful certification for your products

**PFI 'Vegan eco' label –
sustainability and veganism
transparently documented.**

The **PFI "Vegan eco" label** can be awarded to certified organic vegan products, materials and process materials. This label allows you to demonstrate your commitment to sustainability to the outside world and effectively draw attention to your products.

The label consists of the two **PFI labels "eco"** and **"Vegan"**.

The **"eco"** module comprises several requirements; amongst other things, quality management, energy-saving measures and compliance with environmental standards, health and safety regulations and social standards are assessed.

As an independent testing body, we set criteria that go beyond the legal requirements. The label is only awarded to products that meet these requirements.
